

Year 5 DT Flapjacks

Over the spring term, year five have enjoyed working in small groups to research, design, make and evaluate a flapjack fit for a superhero.

After working together to create design criteria for the product, it was decided that superfoods were to be an essential part of the recipe because they are strong sources of vitamins, minerals and other nutrients – things superheroes definitely need!

We all had a lot of fun researching existing products and using them to create our own initial ideas before developing our final design, ready to make.

It was brilliant fun making our recipes and we all thoroughly enjoyed tasting them too!

Some of us found that there were parts of the recipe or design that would need changing if we were to make them again but we all had great fun and achieved our objective – a perfect snack for a superhero on the go!
